Title

40-3: Reactivation and modernization of the Bx series

Summary

The manufacturing of the famous Bx series by BORSIG has been suspended in 1996. BORSIG ZM Compression is reactivating and modernizing this series. The lecture shall show which difficulties arose with the reactivation and its solution. In addition, it shall be made a comparison between the design features of "then" and now including some remarks on the use of technology and also of other materials. It will be presented already realized and still planned alterations.
