VDMA: International Rotating Equipment Conference 2019
Call for Papers with excellent worldwide response

Frankfurt, 11 December 2018 – The Call for Papers for the International Rotating Equipment Conference 2019 has ended. "Visionaries and specialists from the pump and compressor industry worldwide followed our call to submit their proposals for technical papers online," says Christoph Singrün, Managing Director of VDMA Pumps + Systems and Compressors, Compressed Air and Vacuum Technology. "We were particularly pleased with the suggestions from pump and compressor users, who are among the world market leaders in their market segments."

At the end of January, the programme committee with high-ranking representatives from science, manufacturers and operators will select the best lectures. The preliminary programme will be published on the conference website <http://www.introequipcon.com> from March 2019. But even those who missed the deadline for submitting a technical contribution can still participate in the event and book a stand at the accompanying exhibition online, become a sponsor or register as a visitor.

With around 750 participants from over 30 countries (2016) and around 700 square metres of exhibition space, the "International Rotating Equipment Conference" is the world leader in the field of pumps, compressors and vacuum technology. This will take place from 24 to 25 September 2019 in the Wiesbaden Congress Centre.

The VDMA represents more than 3200 companies in the medium-sized mechanical and plant engineering sector. With 1.35 million employees in Germany and a turnover of 226 billion euros (2017), the sector is the largest industrial employer and one of the leading German branches of industry overall..
