International Rotating Equipment Conference 2019 Users learn from experts

Frankfurt, 27 August 2019 – The International Rotating Equipment Conference 2019 from 24 to 25 September 2019 in Wiesbaden offers expert know-how for users of pumps, compressors and vacuum technology through technical lectures and a trade exhibition. The extensive conference programme with almost 70 presentations will focus on topics related to digitisation.

"Conference topics benefit from the authors' expert knowledge", informs Christoph Singrün, Managing Director of the VDMA Pumps + Systems, Compressors, Compressed Air and Vacuum Technology Association. He adds: "Our conference offers users of pumps, compressors and vacuum technology the unique opportunity to deepen their knowledge and find out about the latest technical trends".

Around 750 participants from over 30 countries attended the "International Rotating Equipment Conference" in 2016, the world's leading conference for pumps, compressors and vacuum technology. The venue is the RheinMain CongressCenter in Wiesbaden. In addition to the conference programme, there will be a trade exhibition on around 700 square metres as well as opportunities for sponsors to participate - available online at <https://www.introequipcon.com>.

The VDMA represents more than 3200 companies in the medium-sized mechanical and plant engineering sector. With around 1.3 million employees in Germany and a turnover of 232 billion euros (2018), the sector is the largest industrial employer and one of the leading German industrial sectors overall.
